

TRIPLE 6

Foliar NPK with CMS

Leading Edge Micronutrient Technology by GroWonders

**Triple 6**, when combined with the **Ultra Trace** micronutrient package, provides crops with all the nutrients and micronutrients essential for plant health and growth. **Triple 6**, in addition to N-P-K, contains calcium, magnesium and sulfur which utilizes the same leading edge technology provided by the carrier agent used in **Ultra Trace**. This technology places Ca, Mg and S in proximity with N-P-K in the plant tissue in order to catalyze the numerous enzymatic reactions required to produce carbohydrates, sugars, amino acids and proteins.

**Benefits:**

- Provides a synergistic relationship between N-P-K and Ca-Mg-S and micronutrients to enhance the production of amino acids and proteins
- High chlorophyll content
- Healthier plants
- Increased growth, maturity and yield
- Maximum benefits are attained when combined with **Ultra Trace**

Physical Properties:

pH	1.5 – 1.9
Density	10.4 lbs/gal

Guaranteed Analysis:

Nitrogen (N)	6.00%
Phosphorous P2O5)	6.00%
Potassium (K2O)	6.00%
Sulfur (S)	1.00%
Calcium (Ca)	2.00%
Magnesium (Mg)	0.50%

**Application Recommendation**

Apply 32 to 40 oz./acre as a foliar diluted with 5 to 10 gal water 2 to 3 times per growing season in the early and mid stages of growth.

**Caution**

Jar Test when mixing with pesticides and herbicides. Avoid exposure to air to prevent oxidation and loss of effectiveness.
